NT Two codominant alleles of factor H are present in mice.
NT Factor H functions as a cofactor in the inactivation of C3b by
serine proteinase I and also increases the rate of dissociation
of the C3bBb complex (C3 convertase) and the (C3b)nBb complex (C5

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
